

I fully support satellite radio. I bought a satellite radio for my neice who lives in Huntington WV. There are only 3 stations where she lives. She truly benefits from satellite radio...the selections of music, and the variety of talk shows about things that she would never hear about or learn about. I, too, have satellite radio in both my vehicles. I still listen to local radio sometimes, but I like the choice and should be permitted to hear whatever I want. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support satellite radio to provide us with programming that we deserve.
